Certificate Course - Vermiculture And Vermicomposting

UNIT I

Introduction and Scope: Earthworm Morphological and Anatomical features – Earthworm Classification - Types and Type study of Earthworms – Earthworm importance.

UNIT II

Principle of Vermicomposting: Precautions of Vermicompost – Physico – Chemical parameters of vermicompost - Collection and Preservation of earthworms for Vermicomposting – Culture techniques of earthworms – Mono and Polyculture techniques – Nutrient contents and Benefits of vermicompost.

UNIT III

Methods of Vermicomposting: Small scale, large scale (Pit method, Box method, Heap method, Window method, Pot method and Tray method) – Types of Vermicompost materials – General procedure in home – Maintenance of Vermicomposting beds – Harvesting the worms.

UNIT IV

Economic of Vermiculture: Use of vermicompost for crop production – Economic importance of vermicompost. Earthworm as animal feed – Medicinal value of earthworm.

UNIT V

Application of vermicompost: Application of Vermicompost in Agriculture and Horticultural practices – Earthworm predators, parasites and pathogens.

Objectives:

- To acquire knowledge about bio-fertilizer
- To create an awareness on solid waste management.
- To impart training on Earthworm Culture Technology
- To create knowledge on self employment opportunity

Advantage of the course & Future Prospects:

- ✓ Students can construct their own compost farm and thereby can get monthly income of Rs. 5000 – 8000
- ✓ Students/ farmers by using vermicompost in their field can increase the crop yield.
- ✓ Students residing in cities can produce vermicompost in small scale for garden/household plants.
- ✓ The candidate can generate income by supplying worms, vermiwash and vermicomposting.
- ✓ By developing and propagating vermicompost technology he/she will directly or indirectly help to prevent environmental pollution, by using vermicompost in the field and thereby increasing crop yield he/she will help to solve food problems.
- ✓ It will lead towards organic farming and healthy food.
- ✓ In today's world, recycling of garbage has become necessary in order to sustain our health and environment. So let's join for "**Four R'S of Recycling Reduce, Reuse, Recycle, Restore**" i.e. certificate course on vermicompost technology.
